Front-End Web Developer | ndumiso29@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL EXPERIENCE

Front-End Web Developer

Chair-man Mills Corp | January 2023 - January 2026

- Managed, maintained and optimized 9 WordPress and Headless CMS sites, improving cross-browser compatibility using Browserstack, and site performance using DevTools, Lighthouse and plugins.
- Delivered 8 conversion focused landing pages from Figma designs, driving a 30% increase in B2B and B2C engagement, informed by A/B testing(Adobe Target), GA4 insights and user behavior analysis.
- Created a custom cookie tracking system using MySQL as the database and PHP for the backend, enabling accurate user analytics and improving lead generation.
- Customized WordPress themes using PHP, ACF, Elementor, and Gutenberg blocks.
- Designed and implemented automated workflows (Zapier, Monday.com), reducing spam submissions by 90% significantly improving lead handling and operational efficiency.
- Coordinated website content updates while identifying technical risks and performance issues, communicating solutions and recommendations to the Marketing team to ensure projects remained on schedule.

Web Developer

Klick Health | January 2020 - November 2022

- Built 6 AEM 6.5 training applications for pharmaceutical sales teams, translating Photoshop designs into mobile responsive, WCAG compliant interfaces using React, TypeScript, HTML5, and SASS.
- Deployed 8 email and banner campaigns using HTML, CSS, JavaScript (GSAP), and Outlook conditional logic, ensuring compatibility; executed campaign delivery through Veeva Vault and Salesforce Marketing Cloud.
- Maintained and updated 2 RESTful API driven GatsbyJS single page applications, translating Figma and Photoshop designs while integrating FDA-approved assets to meet strict regulatory requirements.
- Improved the performance of an internal jQuery screenshot tool by utilizing ESLint to identify and address compatibility issues, resulting in a 30% efficiency boost to Sci-Regs testing.

Project Lead - Rinvoq Skyrizi CD PlayBook

Tech Stack: AEM 6.5, HTML5, CSS3/SASS, JavaScript

- Owned full lifecycle delivery of the Rinvoq and Skyrizi PlayBooks on AEM 6.5; coordinated development, QA, and release processes to achieve 100% on time launches.
- Streamlined deployments using GitHub Actions CI/CD pipelines, improving repeatability and reducing errors.
- Led a team of 4 developers, conducting code reviews, coordinating releases, and partnering with project managers to translate business requirements into development tasks.
- Communicated technical progress, analytics implementations, and release status to 6+ cross-functional and non-technical teams, standardizing updates and improving cross-team alignment and decision speed.

Web Developer

Ontario SEO | January 2017 - October 2019

- Developed and optimized WordPress (WooCommerce) and Drupal websites using JavaScript, PHP, and MySQL, with a strong focus on security, performance and accessibility.
- Conducted cross-browser, responsive, accessibility and automated testing.
- Improved analytics tracking through GTM and GA4 event tracking configurations.
- Implemented structured data and SEO strategies (Yoast SEO), improving organic visibility.
