Front-End Web Developer | ndumiso29@gmail.com | [LinkedIn](#) | [Portfolio](#)

Professional Experience

Chair-man Mills Corp | Front-End Web Developer

January 2023 - March 2026

- Built 15+ responsive, reusable Gutenberg blocks and ACF field groups, reducing page build time by 30% and enabling non-technical editors to launch brand pages 2× faster while maintaining WCAG 2.1 AA accessibility.
- Maintained 9 WordPress and Headless CMS sites, leveraging BrowserStack for cross-browser testing and Lighthouse for performance audits, achieving 90+ PageSpeed scores, reducing load time from 4.2s to 1.8s.
- Delivered 8 WordPress landing pages from Figma designs for B2B and B2C campaigns, implementing A/B tests with Adobe Target and GA4 event tracking that increased engagement by 30%, reduced bounce rate by 22%.
- Automated lead capture workflows using Zapier and Monday.com API integrations, implementing spam filtering and validation rules that reduced fraudulent submissions by 90%.
- Created a custom cookie tracking system using MySQL as the database and PHP for the backend, enabling accurate user analytics and improving lead generation by 40%.

Klick Health | Web Developer

January 2020 - November 2022

- Built 6 AEM training applications for pharmaceutical sales teams (100+ users), translating Photoshop designs into WCAG 2.1 compliant AEM interfaces, achieving 98% cross device compatibility.
- Improved AEM page speed by identifying and removing unused components from legacy site migrations in collaboration with QA using Groovy Console.
- Produced 5 email and animated banner campaigns using HTML, CSS, JavaScript, and GSAP, applying Outlook conditional code to achieve 95%+ render consistency, lifting average click-through rate by 18%.
- Used AI-assisted code generation to streamline development, troubleshooting, performance and accessibility, before implementation

Rinvoq Skyrizi Project | Lead Web Developer

Tech Stack: AEM, JavaScript, HTML5, SASS

- Owned full lifecycle delivery of the Rinvoq and Skyrizi PlayBooks on AEM 6.5; coordinated development, QA, and release processes to achieve 100% on time launches.
- Led migration of 50+ pages from AEM 6.4 to 6.5, reducing content publishing time by 50% and eliminating 95% of legacy template errors.
- Mentored 4 developers on AEM best practices and code review processes.
- Standardized technical communication across 4+ cross-functional teams (BA, Sci-Reg, QA, UX) delivering weekly progress reports.

Ontario SEO | Web Developer

January 2017 - October 2019

- Engineered responsive layouts using modern CSS (Flexbox, Grid, CSS variables), achieving 100% mobile compatibility and reducing layout-related bug reports by 70%.
- Optimized critical CSS and implemented lazy loading for images, decreasing Largest Contentful Paint (LCP) from 4.2s to 1.8s and boosting mobile conversion by 18%.
- Refined technical SEO across 30+ web pages by improving metadata, semantic HTML, internal linking, and page performance, increasing organic traffic by 25%.
- Reduced bounce rate on WordPress site by 30% through performance improvements including image optimization, minification, and CDN integration.
